STRENGTHS

- People development and coaching
- Technical depth and breadth
- Cross-functional alignment
- Strategic and delivery balance
- Continuous learning mindset

PROFILE

An engineer at heart who found a calling in leadership. My career began at the Barcelona Supercomputing Center (BSC), where I built deep expertise in distributed computing, HPC, and Big Data — foundations that still shape how I approach technical challenges. Dynatrace opened the door to people management, and I quickly realised that my true passion lies at the intersection of technical strategy and team growth. At Seqera I have continued that journey as Senior Manager, leading engineering teams through the full people-management lifecycle while contributing to product direction and aligning engineering goals with business strategy. I believe great teams are built on trust, honest feedback, and clear ownership — and I measure success as much by the growth of the people around me as by the products we ship together.

EXPERIENCE

Seqera
Spain — *November 2024 – Today*

Senior Manager
October 2025 – Today

Lead a group of engineers through the full people-management lifecycle — 1:1s, career development plans, 360-feedback, and performance reviews. Partner with product to define the roadmap, drive agile ceremonies, and align engineering goals with business strategy.

Leadership | Engineering Management | Coaching and Mentoring | Decision-making | Communication | Delegation

Technical Lead
February 2025 – October 2025

Provided technical leadership to a distributed engineering team, driving architectural decisions, owning the technical roadmap, and collaborating with product and stakeholders to deliver scalable cloud-native solutions.

Java | Groovy | Angular | Micronaut | Hibernate | Docker | Kubernetes | Technical Strategy

Senior Software Engineer
November 2024 – February 2025

Backend engineering focused on Seqera Platform development and cloud infrastructure, contributing to feature delivery and system reliability as an individual contributor.

Java | Groovy | Angular | Micronaut | Hibernate | Docker | Kubernetes

Dynatrace
Spain — *October 2020 – November 2024*

Team Lead
June 2022 – November 2024

Led a team of engineers through the full people-management cycle — 1:1s, career development plans, 360-feedback, and performance reviews. Co-defined the product roadmap, maintained the backlog, aligned priorities with stakeholders, and facilitated agile ceremonies.

Java | React | Leadership | Performance Reviews | Engineering Management | Coaching and Mentoring | Decision-making | Communication | Delegation

Senior Software Engineer
October 2020 – June 2022

Designed and implemented solutions for session data processing and aggregation in real-user monitoring, and contributed to the next-generation storage architecture for behavioural analytics.

Java | Kotlin | React | NodeJS | Bash | Cassandra | ElasticSearch | Spark | Jupyter | Spring | Docker | Helm | ArgoCD | Terraform | Gradle

Barcelona Supercomputing Center (BSC)
Spain — *April 2014 – October 2020*

Software Engineer
May 2017 – October 2020

Developed and extended COMPSs within BSC's Workflows and Distributed Computing group, spanning data science workflow orchestration, automatic Python loop parallelisation, container integration, hybrid task-dataflow execution, and Kafka-based streaming support.

Java | Python | Bash | C++ | Maven

Junior Developer
February 2016 – May 2017

Enhanced the infrastructure and deployment pipelines of COMPSs and designed and implemented multiple features across the runtime.

Java | Python | Bash | Maven | Jenkins

Junior Research Engineer

April 2014 – February 2016

Built a testing infrastructure for COMPSs and redesigned its Monitoring component within the Grid Computing group.

Java | Python | Bash | Maven | ZK Framework | Apache Tomcat

Academia SOL

September 2011 – December 2013

Spain

Teacher

September 2011 – December 2013

Delivered academic tutoring and subject reinforcement to undergraduate engineering students across ETSEIB, EUETIB, and FIB. Taught Heat Transfer, Mathematics, Theory of Computation, Informatics, and Programming, adapting to individual learning needs to improve student outcomes.

Python | C++ | Bash | Lazarus | Public Speaking

Education

2020 **Doctor of Philosophy (Ph.D.) in Computer Architecture**
Thesis: Programming models to support Data Science Workflows
Mark: Excellent Cum Laude
Computer Architecture Department (DAC), Universitat Politècnica de Catalunya (UPC)

2017 **MSc in Innovation and Research in Informatics (MIRI)**
Specialised in High Performance Computing (HPC)
Universitat Politècnica de Catalunya (UPC)

2014 **Diploma in Double Bachelor and Master of Engineering**
Centre de Formació Interdisciplinaria Superior (CFIS), UPC

2014 **Bachelor and Master of Engineering in Industrial Engineering**
Escola Tècnica Superior d'Enginyeria Industrial de Barcelona (ETSEIB), UPC

2014 **Bachelor and Master of Engineering in Computer Sciences**
Facultat d'Informàtica de Barcelona (FIB), UPC
